

Legislation requires that employers ensure that all their employees are competent to carry out their undertakings. It is recognised that personnel may be employed by a company without having the relevant qualifications or experience and therefore need to undergo training

Akeva will assist our clients to address their individual health, safety and training needs by arranging in-house or public courses for personnel at all levels from boardroom to shop floor.

The following is an example of the training courses that Akeva can offer.

AKEVA COURSES
